A photograph of a volcanic eruption. A large plume of bright orange and yellow lava and ash is being ejected from a volcano, rising into a sky that transitions from a pale yellow at the top to a deep blue at the bottom. The foreground shows the dark silhouette of a mountain range.

## Volcanic Systems and Deposits

**Core Module 1**  
Version 2 - 2016

<b>1 Introduction .....</b>	<b>5</b>	5.2.1 Mafic / basaltic lavas .....	93
1.1 Volcanic basins.....	6	5.2.2 Acidic / silicic lavas .....	95
1.2 Understanding volcanic deposits.....	8	5.3 Lava structures and textures.....	96
1.3 Igneous rock types.....	10	5.4 Lava deltas .....	101
1.4 Why rocks melt .....	10	5.5 Sub-marine flows .....	106
1.5 Types of volcano .....	12	5.6 Lava-sediment interbeds.....	110
1.6 Types and scales of eruption.....	14	5.7 Lava sequences offshore.....	112
1.7 Large Igneous Provinces.....	18	5.8 Lava flows summary .....	115
<b>2 Geodynamics and Volcano Tectonics..</b>	<b>21</b>	<b>6 Eruptions 2   Explosive Pyroclastic ..</b>	<b>117</b>
2.1 Volcanism and tectonic settings.....	22	6.1 Structures and textures .....	118
2.1.1 Plate controls on volcanism .....	22	6.1.1 Juvenile components.....	120
2.2 Rift settings .....	25	6.1.2 Lithic fragments.....	120
2.3 Subduction settings.....	27	6.1.3 Primary depositional structures.....	120
2.4 Transform settings.....	29	6.2 Pyroclastic flows and ignimbrites .....	122
2.5 Hotspot settings.....	30	6.3 Hydrovolcanic eruptions.....	124
2.6 Ancient volcanic basins .....	31	6.4 Air fallout and ash beds .....	126
2.6.1 Rifted margins.....	31	6.5 Epiclastic rocks .....	129
2.6.2 Compressional margins .....	31		
2.7 North Atlantic case study .....	32	<b>7 Structure and Volcanic Rocks.....</b>	<b>133</b>
2.7.1 Basin depo-centre migration .....	33	7.1 Fault architecture .....	134
2.7.2 The role of transform structures.....	35	7.1.1 Fault rock classification.....	135
2.7.3 Volcanic structure on the Faroe Islands.....	37	7.1.2 Fault permeability structure .....	135
2.7.4 Understanding the break-up.....	38	7.1.3 Reactivated faults .....	136
		7.1.4 Fault scaling .....	136
		7.2 Deformation mechanisms.....	140
<b>3 Classification of Igneous Rocks .....</b>	<b>43</b>	7.3 Controls on permeability .....	143
3.1 Colour and composition .....	46	7.3.1 Strike slip fault systems.....	144
3.2 Texture.....	48	7.3.2 Normal fault systems.....	146
3.3 Mineral identification .....	53	7.3.3 Textural development.....	146
3.4 Rock type classification .....	56	7.3.4 Permeability with depth.....	149
3.5 Geochemical classification.....	59	7.3.5 Lithological controls on faults.....	149
3.6 Pyroclastic / volcanoclastic .....	60	7.3.6 Fault model summary.....	155
3.7 Cuttings classification .....	62		
3.8 Summary check list .....	63	<b>8 The Volcanic Facies Approach .....</b>	<b>157</b>
		8.1 Volcanic facies .....	158
<b>4 Shallow Intrusions .....</b>	<b>65</b>	8.2 Intra facies .....	160
4.1 Volcanic plumbing systems.....	66	8.3 Facies and facies associations .....	165
4.2 Types of intrusion.....	67	8.4 Seismic facies .....	169
4.2.1 Dykes and cone sheets .....	69	8.5 Facies summary .....	172
4.2.2 Sills .....	70	8.6 Facies and rock properties .....	174
4.2.3 Laccoliths .....	75	8.7 Building 3D models .....	178
4.2.4 Pipes, diatremes and vents.....	76	8.8 Facies evolution model .....	182
4.3 Igneous centres .....	78		
4.4 Modelling intrusions .....	80	<b>9 Bibliography and Notes .....</b>	<b>187</b>
4.4.1 Dyke emplacement .....	80	9.1 Explanatory notes .....	188
4.4.2 Cone sheet emplacement .....	82	9.2 Abbreviations and key terms.....	188
4.4.3 Modelling sills.....	82	9.3 Further reading.....	189
4.4.4 Modelling vent complexes.....	85	9.4 References .....	190
4.4.5 Modelling heat flow.....	85		
<b>5 Eruptions 1   Lava Flows.....</b>	<b>87</b>		
5.1 Lava flow emplacement .....	91		
5.2 Basic vs. acidic composition .....	92

## Petrophysical Properties and Drilling

Core Module 2  
Version 2 - 2016

<b>1 Introduction .....</b>	<b>1</b>	<b>5 Drilling.....</b>	<b>63</b>
1.1 Context .....	2	5.1 Drill bit variation .....	65
1.2 Volcanic constructions .....	6	5.2 Rate of penetration .....	66
1.3 Importance of well data.....	6	5.3 Drilling fluid and circulation.....	68
<b>2 Tool Box.....</b>	<b>11</b>	5.4 Drilling and volcanic clays .....	76
2.1 Sources of data.....	12	5.5 Wash-outs and cavings.....	80
2.1.1 Volcanic assessment .....	12	5.6 Drilling and facies prediction .....	83
2.1.2 Standard logging suite .....	15	5.7 Drilling summary.....	84
2.1.3 Data acquisition summary .....	17	<b>6 Core and Cuttings.....</b>	<b>87</b>
2.2 Literature background .....	17	6.1 Core and sidewall core data .....	88
<b>3 Volcanic Rock Properties.....</b>	<b>19</b>	6.1.1 Full core.....	89
3.1 Composition.....	22	6.1.2 Sidewall core.....	92
3.1.1 Bulk composition .....	22	6.2 Ditch cuttings data .....	93
3.1.2 Phenocryst phases.....	23	6.2.1 Assessing data constraints.....	93
3.1.3 Magnetic properties .....	23	6.2.2 Volcanic cuttings.....	94
3.2 Construction .....	26	6.2.3 Classification .....	94
3.2.1 Grain size and fluid saturation.....	26	6.2.4 Log style output .....	100
3.2.2 Volcanic glass.....	27	6.2.5 Calibration and drilling .....	103
3.2.3 Porosity structure .....	27	6.3 Secondary analysis.....	104
3.2.4 Mineral layering .....	28	<b>7 Summary .....</b>	<b>107</b>
3.2.5 Volcaniclastic rocks .....	29	7.1 Basic model .....	108
3.3 Secondary alterations .....	29	7.2 Work flows and integration.....	108
3.3.1 Fracturing and shearing .....	30	7.2.1 Real-time drilling.....	108
3.3.2 Chemical and mineral changes .....	31	7.2.2 Full volcanic well analysis .....	112
3.3.3 Basaltic glass.....	34	7.2.3 Integration .....	113
3.3.4 Mineral balancing.....	34	7.3 Summary.....	114
3.4 Data ranges.....	34	<b>8 Bibliography and Notes .....</b>	<b>117</b>
<b>4 Wireline Volcanics .....</b>	<b>41</b>	8.1 Explanatory notes .....	118
4.1 Lava flows .....	42	8.2 Abbreviations and key terms .....	118
4.1.1 Simple tabular lavas.....	42	8.3 Further reading.....	119
4.1.2 Stacked lavas .....	43	8.4 References .....	120
4.1.3 Compound lavas.....	44		
4.1.4 Lavas and the FMI log.....	44		
4.1.5 High gamma lavas .....	45		
4.2 Hydro-volcanic and volcaniclastic rocks .....	49		
4.2.1 Hyaloclastite.....	49		
4.2.2 Volcaniclastic .....	50		
4.2.3 Interbeds and boles .....	54		
4.3 Explosive volcanics .....	54		
4.3.1 Tuff markers.....	55		
4.3.2 Acidic explosive volcanics .....	56		
4.4 Intrusions .....	57		
4.4.1 Sill correlation .....	57		
4.4.2 Intrusions invading lavas .....	57		
4.4.3 Altered sills .....	59		
4.4.4 Fractured sills.....	60

## Sub- and Intra-Basalt Seismic Imaging

Core Module 3  
Version 2 - 2016

<b>1 Introduction .....</b>	<b>1</b>
1.1 Context .....	2
1.2 Volcanic basin prospectivity.....	5
1.3 Basalt imaging .....	8
<b>2 Igneous Complexes .....</b>	<b>15</b>
2.1 The volcanic system .....	16
2.2 Seismic properties.....	24
<b>3 Wave Propagation .....</b>	<b>29</b>
3.1 Basalt imaging .....	31
3.2 VSP experiments.....	35
3.3 Sill imaging.....	38
<b>4 Conventional Seismic .....</b>	<b>46</b>
4.1 Outline of Vøring case studies .....	47
4.2 Reprocessing of 2D data .....	48
4.2.1 MNR08-353 .....	48
4.2.2 HV-96 profiles .....	51
4.3 3D seismic cube.....	54
<b>5 Other Imaging Techniques.....</b>	<b>59</b>
5.1 Challenges and possible solutions.....	60
5.2 Deep imaging .....	64
5.3 P-Cable data.....	65
<b>6 Work Flow .....</b>	<b>69</b>
6.1 Summary.....	70
<b>7 Bibliography and Report Notes .....</b>	<b>75</b>
7.1 Explanatory notes.....	76
7.2 Key terms and abbreviations .....	76
7.3 Further reading .....	77
7.4 References.....	78

## Seismic Interpretation of Igneous Units

Core Module 4  
Version 2 - 2016

<b>1 Introduction .....</b>	<b>5</b>	<b>6 Hydrothermal Vent Complexes .....</b>	<b>85</b>
1.1 Context .....	6	6.1 Identifying vent complexes .....	86
1.2 Seismic data and imaging .....	9	6.2 Distribution and occurrence .....	90
1.3 Subsurface analogues.....	11	6.2.1 Norwegian margin .....	90
<b>2 Igneous Features on Seismic - Initial Screening.....</b>	<b>15</b>	6.2.2 Greenland margin .....	90
2.1 Data screening.....	16	6.3 Vents in outcrop.....	94
2.2 Visualization techniques.....	21	6.4 Tulipan 3D study .....	96
2.2.1 Colour bands.....	21	<b>7 Other Igneous Features .....</b>	<b>103</b>
2.2.2 Flattening.....	21	7.1 Volcanic centre.....	105
2.2.3 3D visualization .....	23	7.2 Pyroclastic rocks.....	106
<b>3 Seismic Volcanostratigraphy.....</b>	<b>29</b>	7.3 Dikes .....	110
3.1 The volcanic margin model .....	31	<b>8 Summary Workflow.....</b>	<b>115</b>
3.2 Onshore analogues .....	36	<b>9 Bibliography and Report Notes .....</b>	<b>123</b>
3.3 Seismic examples.....	38	9.1 Explanatory notes .....	124
<b>4 Igneous Seismic Geomorphology.....</b>	<b>45</b>	9.2 Abbreviations and key terms .....	124
4.1 Seismic geomorphology .....	46	9.3 Further reading.....	125
4.2 Application to data sets .....	49	References .....	126
4.3 Vøring Margin case study .....	49		
<b>5 Sill Complexes .....</b>	<b>61</b>		
5.1 Basic sill interpretation .....	62		
5.2 Mapping sills in 3D .....	69		
5.2.1 Picking sills.....	69		
5.2.2 Opacity/volume rendering .....	70		
5.2.3 Geobody extraction.....	71		
5.3 Key emplacement features.....	72		
5.4 Mapping the plumbing system.....	80

## Volcanic Basin Petroleum Systems

**Core Module 5**  
Version 2 - 2016

<b>1 Petroleum in Volcanic Basins .....</b>	<b>1</b>		
1.1 Why are volcanics important? .....	2		
1.2 Global prospective volcanic basins .....	5		
1.2.1 Basin distribution .....	5		
1.2.2 Volcanic related discoveries .....	5		
1.3 Rifted margins prospectivity .....	9		
1.4 Petroleum system basics .....	10		
1.5 Compressional margin model .....	15		
<b>2 Source Rocks and Maturation .....</b>	<b>17</b>		
2.1 Source rocks .....	19		
2.2 Maturation .....	23		
2.2.1 The effect of intrusions .....	24		
2.2.2 Modelling approaches .....	26		
2.2.3 Thermal models .....	29		
2.2.4 Fluid flow models .....	30		
<b>3 Migration .....</b>	<b>39</b>		
3.1 Intrusions .....	41		
3.2 Fractures and faulting .....	45		
3.3 Vent complexes .....	46		
3.4 Volcanic edifices .....	48		
<b>4 Reservoir Rocks .....</b>	<b>51</b>		
4.1 Intrusions .....	52		
4.1.1 Fracturing .....	52		
4.1.2 Alteration .....	55		
4.2 Intra-lava .....	58		
4.2.1 Columbia River Basalt Province .....	58		
4.2.2 Deccan Traps .....	61		
4.2.3 Disko–Nuussuaq .....	62		
4.3 Inter-lava .....	66		
4.3.1 Rosebank .....	66		
4.3.2 Kudu .....	69		
4.3.3 Barracuda .....	75		
4.3.4 Onshore analogues .....	77		
4.4 Explosive volcanics .....	79		
4.4.1 Samgori .....	79		
4.4.2 Austral Basin .....	81		
<b>5 Traps and Seals .....</b>	<b>88</b>		
5.1 Traps .....	88		
5.1.1 East Greenland .....	88		
5.1.2 Phetchaban Basin .....	92		
5.1.3 Bight Basin .....	93		
5.1.4 Volcanic edifices, USA .....	98		
5.1.5 Yellow Sea Basin .....	98		
5.2 Seals .....	101		
5.2.1 Lava flows .....	101		
5.2.2 Hydro- and volcani-clastic rocks .....	104		
5.2.3 Explosive volcanic deposits .....	104		
5.2.4 Intrusive rocks .....	104		
<b>6 Summary .....</b>	<b>107</b>		
6.1 Positive volcanics .....	108		
6.2 Negative volcanics .....	109		
6.3 Best practices .....	110		
6.4 Outlook .....	112		
<b>7 Neuquén Basin Case Study .....</b>	<b>115</b>		
7.1 Overview of Neuquén Basin .....	116		
7.1.1 Location .....	116		
7.1.2 Geodynamic setting .....	116		
7.1.3 Stratigraphy .....	119		
7.1.4 Igneous rocks and processes .....	121		
7.1.5 Hydrocarbon geology .....	123		
7.2 Payen Volcanic Complex .....	124		
7.2.1 Geological setting .....	124		
7.2.2 Oil occurrence and maturity .....	125		
7.2.3 Thermo-chemical modelling .....	127		
7.3 Auca Mahuida Volcano .....	130		
7.3.1 Overview .....	130		
7.3.2 Hydrocarbon systems .....	130		
7.3.3 Fractured reservoirs .....	132		
7.3.4 Primary and secondary porosity .....	133		
7.4 Rio Grande Valley .....	135		
7.4.1 Hydrocarbon bearing intrusions .....	137		
7.4.2 Attributes from core .....	137		
7.4.3 Fractures from outcrop .....	138		
7.4.4 Porosity and permeability .....	140		
7.5 Bitumen veins .....	144		
7.5.1 Localities .....	146		
7.5.2 Bitumen vein characteristics .....	146		
7.5.3 Link with volcanism .....	147		
<b>8 Faroe-Shetland Basin Case Study .....</b>	<b>151</b>		
8.1 Overview of the FSB .....	152		
8.1.1 Exploration history in the basin .....	152		
8.1.2 Basin challenges .....	154		
8.2 Basin structure .....	154		
8.2.1 Main rifting episodes .....	154		
8.2.2 The rifted margin .....	155		
8.2.3 Basin stratigraphy .....	155		
8.3 Volcanism .....	155		
8.3.1 Regional distribution .....	155		
8.3.2 Igneous centers .....	156		
8.3.3 Stratigraphy and timing .....	156		
8.4 Onshore Faroe Islands .....	161		
8.4.1 Location and setting .....	161		
8.4.2 Volcanic facies and stratigraphy .....	162		
8.5 Offshore volcanics .....	165		
8.5.1 Extent of volcanics .....	165		
8.5.2 Intrusive facies .....	165		
8.5.3 Extrusive facies .....	165		
8.6 The FSB petroleum system .....	170		
8.6.1 Source rocks .....	170		
8.6.2 Maturation .....	170		
8.6.3 Migration .....	172		
8.6.4 Reservoirs .....	176		
8.6.5 Trap and seals .....	177		
8.6.6 Play model .....	179		
8.7 Case examples .....	179		
8.7.1 Rosebank .....	179		
8.7.2 Tobermory .....	186		
8.7.3 Marjun .....	188		
8.7.4 Brugdan .....	191		
<b>9 Utgard High Case Study .....</b>	<b>196</b>		
9.1 Utgard High Background .....	196		
9.1.1 Geological setting .....	196		
9.1.2 Seismic line and well data .....	199		
9.1.3 Host sediment properties .....	201		
9.2 Layer Modelling .....	205		
9.2.1 Thermal model 1 .....	205		
9.2.2 Model sensitivity .....	207		
9.3 2D Transect Modelling .....	208		
9.3.1 Thermal model 2 .....	208		
9.3.2 Fluid model 1 .....	210		
9.3.3 Fluid model 2 .....	212		
9.3.4 Methane production .....	212		
9.3.5 Basin scale implications .....	214		
<b>10 Bibliography and Notes .....</b>	<b>219</b>		
10.1 Explanatory notes .....	220		
10.2 Abbreviations and key terms .....	220		
10.3 Further reading .....	221		
10.4 References .....	222
